

Dean Sanders

Gourmet Grass with Half the Water: Vortex Structured Water

Video Transcript

when I put one Vortex on with the spring lock on one sprinkler there the kettle just

0:07

7 seconds

hammered that one area where the vortex was okay so they could sense the energy and they could they could the the what

0:15

15 seconds

it is it sweetens the grass and they just eat that one area where that one sprinkler ran

0:22

22 seconds

hello again everyone the video you're about to watch We're reissuing it we reprocessed it because

0:31

31 seconds

when we introduced it and Dean Sanders four years ago there was a whole bunch of wind now

0:38

38 seconds

welcome to Sunny corrup I'm here with uh Dean Sanders and Dean put one of our

0:45

45 seconds

president water vortex devices on and the wind was part of the experience

0:51

51 seconds

and with the help or assistance of new technology that basically allows you to

0:58

58 seconds

process those extra sounds out or better allows you to focus and enhance the

1:05

1 minute, 5 seconds

audio the human speech it's just a different quality now much much better in the same way that our Vortex generators work in the sense that

1:14

1 minute, 14 seconds

it reduces the Distortion you start to see the effects of vortexing where you

1:21

1 minute, 21 seconds

have water with noise if you will and it stuff that's in it that's chaotic and you see the effects you see what occurs

1:30

1 minute, 30 seconds

when the forces are brought to bear that actually processes and reduces if not

1:37

1 minute, 37 seconds

eliminates that Distortion you get water that actually works well in this case we're getting audio that actually works

1:45

1 minute, 45 seconds

we're getting meaning that is more meaningful so as Dean Sanders says uh

1:52

1 minute, 52 seconds

yeah I had to say that so anyway with all that said here's Dean and Jody thank you

Chapter 2: Vortex Stories

2:02

2 minutes, 2 seconds

welcome to the sunny corip I'm here with uh Dean Sanders and Dean put one of our

2:10

2 minutes, 10 seconds

president water vortex devices on at the beginning of this summer he's been running a couple of devices around the

2:16

2 minutes, 16 seconds

show one and two inch units and we're in a paddock that uh that he's had Catalan

2:23

2 minutes, 23 seconds

for all the summer isn't it yeah all of Summer yep and uh so what have you noticed since you've been putting on
2:32
2 minutes, 32 seconds
since you put the vortex device on mate well uh well before I put the vortex on I was watering this this is one hectare
2:41
2 minutes, 41 seconds
I was watering this Paddock every day every night I was watering this Paddock um
2:48
2 minutes, 48 seconds
and I was running about 15 head in it but after I put the vortex on
2:55
2 minutes, 55 seconds
I I started off with 12 head um and I upped it to 20 and then I upped them to 29.
3:06
3 minutes, 6 seconds
and I said and with that I was only watering a couple of days a couple of days a week
3:14
3 minutes, 14 seconds
so you drop so you've gone from 15 to 29 basically you've doubled your numbers on it on on one hectare yeah and you and
3:23
3 minutes, 23 seconds
you were watering uh uh every day beforehand and now you're watering every three days
3:32
3 minutes, 32 seconds
twice a week twice a week yeah twice a week that night and how much were you putting on and how much do you put on now
3:39
3 minutes, 39 seconds
well before I was putting on I was putting on um a hundred thousand liters
3:50
3 minutes, 50 seconds
well put on 100 000 liters every two hours so when you water all night you're putting on millions of liters of water yeah
3:59
3 minutes, 59 seconds
um so so basically it'll only night so every night you're putting millions of liters of water on where now I'm running
4:06
4 minutes, 6 seconds
we're now with the vortex I'm only putting out a hundred thousand liters tors a week for us a couple hundred thousand liters
4:14
4 minutes, 14 seconds
inside myself a heck of a lot of water by using it and the cattle 29 cattle could not keep up
4:21
4 minutes, 21 seconds
to the feed I had to some in fact sometimes I I didn't water for a whole week just to allow the cattle to eat the grass
4:30
4 minutes, 30 seconds
and get it right down again although I just noticed a huge difference where the quality of the grass
4:38
4 minutes, 38 seconds
and the and the way that the cattle were eating it okay and so you you've gone from using millions of liters of water so you what
4:47
4 minutes, 47 seconds
what is that all that extra water mean for you it's well my dance is still full and in the previous year at this time of
4:54
4 minutes, 54 seconds
year in May this time of the year in May uh on previous years uh three dams I pump out would be empty
5:03
5 minutes, 3 seconds
where this year um I've got one and a half of those well I've got I've got exactly I've got one
5:11
5 minutes, 11 seconds
and a half dams full okay so so basically I've used one and a half and usually you've used all three yeah it's an old and usually the whole
three
5:20
5 minutes, 20 seconds
empty and I and I can't hear a gate oh at the moment it's very dry we haven't had much right and now I'm thinking about irrigating this
Paddock just to

5:29

5 minutes, 29 seconds

fight these animals so I wish I can because I've still got a full Dam and another dab it's heart pulled but so

5:37

5 minutes, 37 seconds

so uh which in the past I've never had that once I've emptied the dams that's it

5:44

5 minutes, 44 seconds

yeah the speed out time it's like keep moving the candle around the whole Farm to keep up you know yeah keep them going

5:52

5 minutes, 52 seconds

so what what would you say to um somebody that's watching this this little video about you know what they

6:00

6 minutes

can expect if they decided they wanted to do something with a Vortex device well

6:07

6 minutes, 7 seconds

I had the first one I first started using it I didn't know how it was going to work

6:14

6 minutes, 14 seconds

but I the first one I put on was on my fruit trees up at the house and I noticed that my fruit trees tripled in

6:22

6 minutes, 22 seconds

fruit stripe within and on those trees that I've just planted that don't have fruit for a year or two had fruit straight

6:30

6 minutes, 30 seconds

away the first year that was a pretty good sign for me to to carry on and get another Vortex and try

6:39

6 minutes, 39 seconds

out down on the irrigation Paddock so that's what I did and yeah if you're

6:46

6 minutes, 46 seconds

uh if you were one of you wonder if you want more grass with a

6:53

6 minutes, 53 seconds

hell of a lot less water yeah and uh a Vortex device might be the way forward it certainly is they are definitely

7:02

7 minutes, 2 seconds

because uh well when you just when I put one Vortex on with the spring lock on one sprinkler

7:10

7 minutes, 10 seconds

there the cattle just hammered that one area where the vortex was okay so they can sense the energy and they could they

7:17

7 minutes, 17 seconds

could the the what it is that sweetens the grass and they just ate that one area where that one sprinkler ran

7:26

7 minutes, 26 seconds

then I changed it and put a bigger one on all Sprinklers and it just they just

7:33

7 minutes, 33 seconds

they can't keep up they couldn't keep up with the grass so I just kept adding cattle into the paddock and they still couldn't keep up 29 still couldn't keep

7:40

7 minutes, 40 seconds

up with one hectare nice and if you put any inputs onto the haven't put anything on the soil only their own manure okay

7:48

7 minutes, 48 seconds

so zero inputs yep do you usually put stuff on it yeah I usually put hay burst on it okay

7:56

7 minutes, 56 seconds

burst on it because it's got nitrogen phosphorus sofa

8:03

8 minutes, 3 seconds

uh magnesium it's got a range of vitamins at clarkia needs yep and uh so that's why I normally use that and it's

8:11

8 minutes, 11 seconds

you know you can get it it's all together so you can buy it in bulk a bag and put it on this year didn't put anything on

8:18

8 minutes, 18 seconds

it just let the cows do it just use their manure that's great mate so I I haven't put any fertilizer on it and

8:26

8 minutes, 26 seconds

it's grown looking you know you can see the Paddy's still green now I've moved the cattle out for the first time

8:33

8 minutes, 33 seconds

um because I've got grass growing and other paddocks to chew that off and um I wanted to irrigate this now

8:40

8 minutes, 40 seconds

without your cattle in it just to see how fast it actually does grow okay great so that's my next test for it

8:48

8 minutes, 48 seconds

beautiful well we look for daring the results mate yeah yeah all right that's uh that's us from Sunny

8:56

8 minutes, 56 seconds

Kirk today um is there anything else you want to add before you before we finish up mate or you do you think that's that's enough yeah no

I reckon that I'm pretty happy

9:04

9 minutes, 4 seconds

with that okay um and uh we'll wait for the next one awesome thanks guys we'll uh see you soon

9:12

9 minutes, 12 seconds

over and out from Sunny Kira

Chapter 3: Tank Master

9:22

9 minutes, 22 seconds

they're called a tank Master a huge jump for filling up all the fly

9:29

9 minutes, 29 seconds

trucks that are very fast they're actually a pressure pump and a volume pump as well they do both

9:38

9 minutes, 38 seconds

high volume high pressure um it did give me the I do have it down

9:55

9 minutes, 55 seconds

[Music]

10:01

10 minutes, 1 second

so this Paddock that we're looking at at the moment said no cattle on it all summer

10:09

10 minutes, 9 seconds

so it's just starting to come back to life this Paddock here is

10:18

10 minutes, 18 seconds

is unirrigated then

10:25

10 minutes, 25 seconds

over here see what a difference the vortex makes

10:33

10 minutes, 33 seconds

[Applause]

10:36

10 minutes, 36 seconds

this all this for more information visit our website

10:46

10 minutes, 46 seconds

at presidentwater.com

10:48

10 minutes, 48 seconds

[Music]

11:12

11 minutes, 12 seconds

all right
